AMBULANCES

Premiere

Parts Catalog

This catalog is not meant to be a "nut and bolt" breakdown of a SJC Ambulance and not every part in this catalog is used on every unit manufactured. It is rather a visual tool to assist us in identifying the correct part that you need to keep your ambulance in top-notch running order.

The single most important piece of information that you can have when calling for parts for your ambulance is the UNIT NUMBER that the factory assigned to it. This can be found (1) on a metal plate fastened to the module directly under the first door on the streetside (driver's side). It can also be found (2) on the unit's information plate attached to the inside door skin of the same door. This number or the chassis' Vehicle Identification Number (3) (visible through the windshield on the driver's side) will greatly assist us in determining which parts were installed by the factory on your ambulance.

(1) Body ID Tag under O2 door

(2) Unit information plate inside skin of O2 door

(3) Vehicle Identification Number (VIN) plate visible through driver's side windshield

We at SJC Industries appreciate your purchase of one of our quality ambulances. Customer satisfaction is one of our highest priorities, therefore, we would like to assist you in every possible way, in determining what parts you are in need of.
